The Basantol® range of liquid dyes comprises metal complexes and direct dyes dissolved in water or in a blend of water/glycoether/glycol. All grades exhibit good fastness properties and can be diluted with water and a range of organic solvents. They are optimized for use in water-based and water-containing wood stains.

The solvent system employed is tailored to the respective dye. Dry coatings based on Basantol® liquid dyes are fast to over coating with paints containing organic solvents like ketones, esters and aromatics.

Composition (Apart from colorant, Basantol® liquid dyes contain mostly water and glycol ether.)

Basantol®		Dyestuff content [%]	Water [%]	Organic solvents [%]	Density [g/cm³]	pH	Fastness to light
Yellow	099 liquid	20	60	20	1.08	9.5	4 - 5
Yellow	215 liquid	30	40	30	1.11	5.5	7
Brown	269 liquid	30	50	20	1.14	6.5	6 - 7
Orange	273 liquid	20	60	20	1.08	4.0	6 - 7
Red	311 liquid	30	50	20	1.12	5.0	6 - 7
Bordeaux	415 liquid	30	40	30	1.11	5.0	4 - 5
Blue	762 liquid	20	80	-	1.12	7.0	7 - 8
Black	X82 liquid	20	75	5	1.14	6.0	6 - 7

Remark: For the evaluation of light fastness, the liquid dyes were applied at 3 % dyestuff content in a water-borne paint with a 100 µm spiral applicator to white cardboard.

The adjustment of each batch of Basantol® dye to constant tinting strength leads to variation in the dyestuff content between batches. The values in the table are rounded to the nearest 5 %.

Physical form: low-viscosity liquids

Shelf life: two years in sealed containers

Note: Basantol® Yellow 099 liquid, Blue 762 liquid and Black X82 liquid must not be stored below 0 °C (32 °F); all other grades are stable to temperature down to -5 °C (23 °F).
